

STOP-TAIL-TURN LIGHT

STT LED Lights meet SAE S2, T2, & I6

LED SIGNAL LIGHTING

Innotec's Stop-Tail-Turn LED Lights with BoardFree® technology have a bold, sleek design that is brighter, thinner, and more rugged than any other tail light on the market. Our patented technology produces a streamlined, thin profile for flexible surface mounting. The design minimizes additional components, eliminates opportunities for damage, and reduces weight. The robust composite material constructed of ABS and PMMA creates a sealed housing that provides superior protection from harsh chemicals, impact, water, and corrosion.

PRODUCT FEATURES

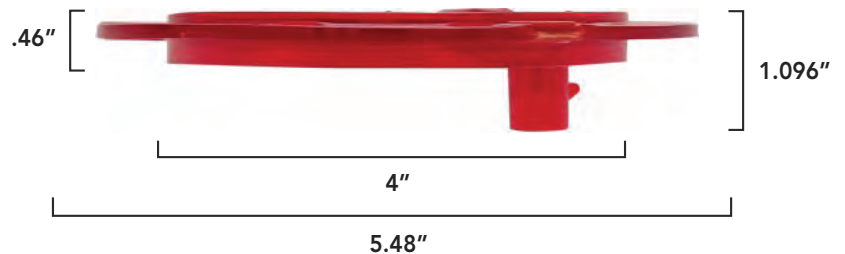

- Impact, water, UV, and chemical resistant
- Fully sealed construction
- Highest impact resistance in the industry
- Meets SAE S2, T2, and I6 specifications
- Sealed and greased 3 Pin Amp Connector
- Slotted low stress mounting holes

*Oval tail light also available. For specifications, please see Turn Signal Light sheet

Light Connects to
3 Pin AMP Connector
