

DURABLE LED LIGHTING

Our penny light is powered by BoardFree® technology. Built without a circuit board that makes its over-molded design possible, we are able to offer one of the most durable and versatile lights on the market. Water, corrosion, vibration, and impact resistance means this LED light is built to last.

Built with durability in mind, the marker light's secure connections withstand damage during installation and use over time. Penny light provides clear and bright light to outdoor spaces like porches and decks, or signal lighting to vehicles and heavy equipment. Our fully sealed design offers an integrated rubber gasket, protecting the wires better than industry standard potted lights.

Features:

- Fully sealed electronics
- Shock and vibration resistant
- Corrosion resistant
- Built-in mounting grommet
- Easy installation

Connector types:

- Flying leads
- Bullet connectors
- Molded connectors

Our Advanced built-in optics place light where you need it

FLEXIBILITY OF DESIGN

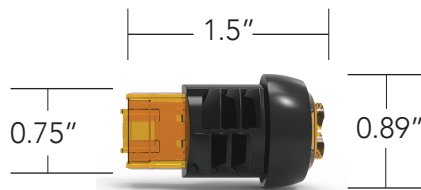

Our Penny light platform offers the versatility and design flexibility to fit many lighting applications. Choose from the options below to build a lighting solution that is right for you.

Custom wire length available

Dimensions:

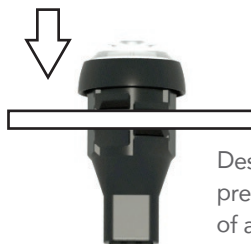

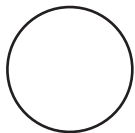

Molded connector style

Available colors:

- Amber
- Red
- White
- Blue

Installation:

Drill 3/4" hole in mounting location

Design to easily mount by pressing into a 3/4" hole of at least 1/8" material 1/4" Max

Built-in strain relief to reduce wire fatigue at bends

Product Data:

Voltage	Rating	Draw	Color	Material	Lumens	Certification
9-15 DC	PC2/PC	15-25 mA	Multiple	Acrylic	18-50	SAE
