Calculating PPM - maximum 40 points

Product which does not conform to the drawing, specifications, and/or agreed upon standards will be counted against Supplier's PPM record. PPM will be reported in the quantity units as purchased. PPM will be calculated as follows:

$$\frac{\text{Total number of defective parts}}{\text{Total number of parts shipped prev. 12 months}} \times 1,000,000 = \text{PPM}$$

Calculating Delivery Performance

Delivery Performance is based on the percentage of on time delivery. Delivery performance is calculated as follows:

$$\frac{\text{Total Number Deliveries received on time}}{\text{Total number of Deliveries previous 12 months}} = \text{Percentage on-time Deliveries}$$

Scorecard Performance Requirements

Score of 90 or more expected

Score of 60 or less requires immediate corrective action as detailed by Innotec
