

LIGHT BAR - LED light system

Built with BoardFree® technology

LIGHTING THAT CAN TAKE A HIT

HIGH IMPACT, LOW PROFILE LIGHTING

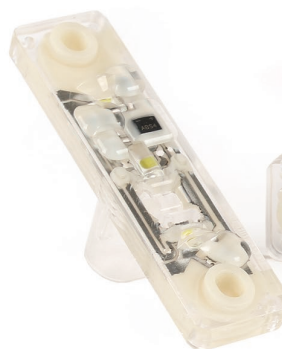

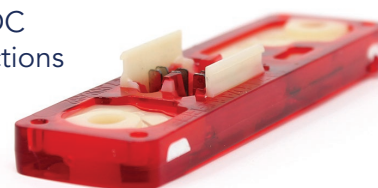

BoardFree is a revolutionary LED technology that enables our engineers to create LED lights that are fully encapsulated and over-molded without the use of a circuit board. Harnessing this technology, we are able to make some of the thinnest and yet most rugged lights on the market.

STANDARD FEATURES

- Water, UV, and chemical resistant
- Fully sealed construction
- Impact resistant
- Advanced thermal management
- Thin design with unmatched durability
- Shock and vibration resistant
- Custom optics per LED

New IDC
connections

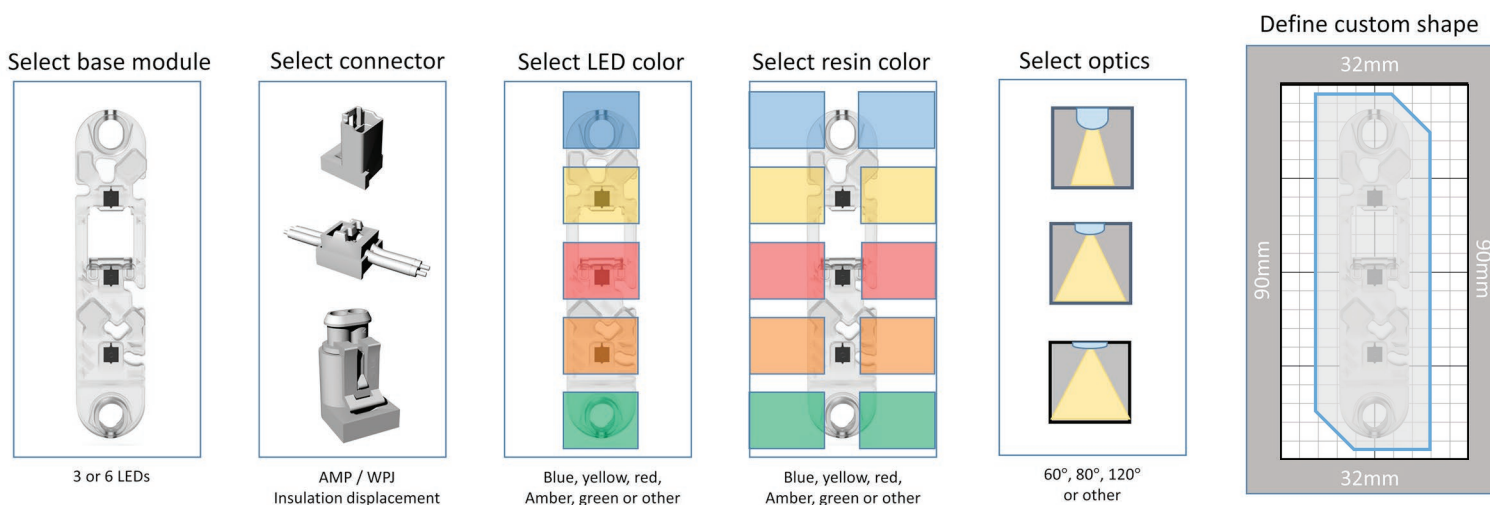

PRODUCT DATA:

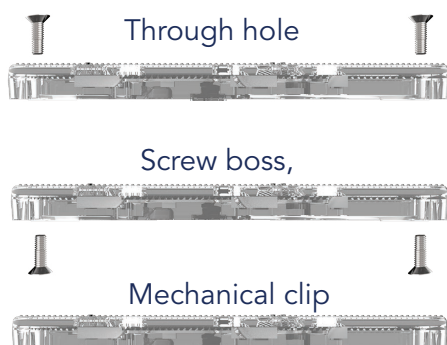

Voltage	Current	Color	Material	Rating	Lumens	Certification
9-16 VDC	100-200 mA	Multiple	Acrylic/ABS	IP67	56-100	SAE

FLEXIBILITY OF DESIGN

Our LED light bar offers the versatility and design flexibility to fit many lighting applications. From motorcycles, ATVs, boats, heavy equipment, landscaping and hardscaping there are countless ways this durable light may be used.

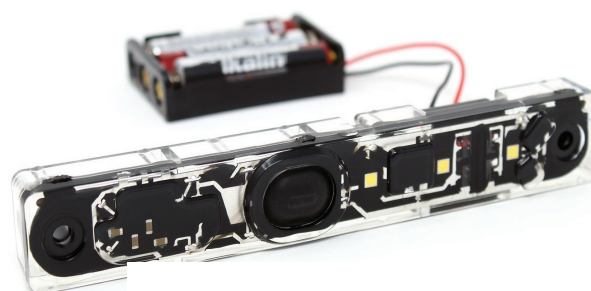

VERSATILE MOUNTING OPTIONS

CUSTOM INTEGRATIONS

Button activated timer circuit for battery operation.
Built-in popple button interface.

IDC - INSULATION DISPLACEMENT
